# INTRODUCTION

Thank you for choosing the **GIULIA X** amplifier. GIULIA X represents the state of the art in Swiss amplifier design, reflecting all the needs of the user. Offering a significantly improved power amp and speaker section, together with a crossover filter network, limiter and gain, this amp provides 70 W (108 dB SPL) of bi-amplified analog power. GIULIA X has a coaxial speaker system with a 1" dome tweeter and 5.5" woofer. It has been engineered with an optimized 2-way bass reflex system.

GIULIA X is ideal for those seeking no-compromise acoustic instrument amplification, while keeping things small and simple. Perfect for practice and home studio use, it is also recommended as a high-quality preamp in venues, connected to Front Of House via the DI OUT. The two inputs can accept one instrument and a vocal microphone.

SCHERTLER amps feature a sophisticated Class-A preamp with no integrated circuits and No Negative Feedback (NNFB), resulting in unparalleled dynamics and fast transient behavior.

To make the most of your GIULIA X amplifier and to ensure trouble-free operation, please **read this manual carefully** before using the amp for the first time. We also advise keeping the manual for future reference.

# IMPORTANT SAFETY INFORMATION

## SAFETY FIRST!

Safety is of major importance when operating any electrical equipment, so please note the following:

On a product, a lightning flash within a triangle indicates the presence of uninsulated “dangerous voltage” within the product enclosure. This may be of sufficient magnitude to cause risk of electric shock.

## ELECTRICAL SAFETY

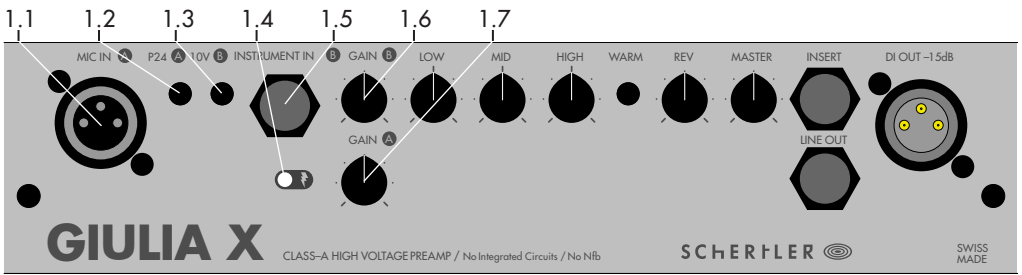

- Before connecting your amplifier to the mains, make sure that the mains voltage does not exceed the voltage specified on the device.
- Do not use your amplifier if its mains cable or plug are not in perfect condition. Replace these as necessary. The replacement cable must be the same as the original.
- Your amplifier should only be connected to a mains socket with a ground protection system.
- When using or installing your amplifier, make sure that the mains socket and the amplifier’s mains cable and plug are easily accessible.
- Do not, under any circumstances, defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade and third prong are provided for your safety. If the supplied plug does not fit your mains socket, consult an electrician for replacement of the obsolete socket.
- Do not expose your amplifier to rain or any other water (even in small amounts). Do not use the amplifier near water.
- Avoid spilling drinks or any other liquids on the amplifier.
- Do not operate your amplifier in excessively humid conditions. Avoid excessive heat from sunshine, fire or similar. If the amp is being used in a dusty environment, make sure it is adequately protected.
- Avoid using or installing your amplifier near any heat sources such as radiators, heat registers, stoves, or other heat-producing apparatus. Do not put any sources of open flame (e.g. candles or pyrotechnics) on or near the amplifier.
- Do not cover your amplifier during use, or obstruct the ventilation flow in any way.
- Always leave sufficient clearance between the heat sink and any other surface.
- Unplug your amplifier during lightning storms, or if it is not going to be used for a while. (Remove the plug from the mains socket to completely disconnect the amplifier.)
- Your amplifier does not contain any “user serviceable” parts. Servicing and/or repairs should only be carried out by qualified personnel. See MAINTENANCE AND REPAIR.

## OPERATIONAL SAFETY

- During installation or live performances, make sure that your mixer's power supply cable cannot be walked on, tripped over or "pinched" – particularly at sockets, around waste bins etc. Also make sure that the power supply cable is not "stressed" at its point of connection to the mixer.
- To avoid interference, do not install your mixer near power transformers, TV sets, RF transmitters, electric motors, or any other sources of electrical energy.
- To avoid potential accidents, only use attachments, accessories and other equipment such as carts, stands, tripods, brackets or cases that are specified or recommended by the manufacturer, or sold with your mixer.
- Loud volume levels can cause irreparable damage to hearing, so avoid the following while using your mixer:
  - acoustic feedback (never point microphones directly at a loudspeaker)
  - high levels of distortion
  - impulse noises (loud "pops") that can occur when a device is switched on/off, connected to or disconnected from a system.

## MAINTENANCE AND REPAIR

- Your mixer can be carefully cleaned, as necessary, using a dry cloth. No water must be used.
- When cleaning, do not use any solvents (such as acetone or alcohol). These could damage the mixer's finish and its labeling.
- Visually check your mixer on a regular basis for any signs of wear and tear or damage, but do not attempt any kind of servicing or repair.
- If your mixer malfunctions, or has been damaged, e.g. if the power supply/cable or plug is damaged, liquid has been spilled or objects have fallen inside, the mixer has been exposed to rain or moisture, does not operate normally, or has been dropped, please call your nearest SCHERTLER technical assistance centre. (For more information, contact us at the address on the last page of this manual.)

1.1. MIC INPUT (XLR): This input is electronically balanced for XLR-type connections. The channel is designed for any kind of microphone source e.g. dynamic and condenser mics.

1.2. P24: Phantom power supplies the XLR connector with 24 VDC for powering condenser microphones. Most condenser (and dynamic) mics, and some preamps, can be safely phantom powered. In certain cases however, phantom power can cause damage. This tends to happen with unbalanced microphones, preamps, or stompboxes that have been modified for balanced XLR use. If in doubt, please contact the manufacturer to check the compatibility of your audio device before using the amplifier.

1.3. 10V: This supplies the jack connector with 10 VDC for powering electret microphones.

1.4. POWER LED: Indicates when the amplifier is switched ON.

1.5. INSTRUMENT IN: An unbalanced input for the connection of 1/4" jacks, with optimal sensitivity for high level signals. The electronics will adapt to any situation - no special action is required.

1.6. GAIN – INSTRUMENT: This variable gain preamplifier adjusts the sensitivity level to ensure the best possible processing of the instrument signal through the channel. It is important that this input level is set and optimized in the best way to achieve the cleanest sound possible.

1.7. GAIN – MIC: This variable gain preamplifier adjusts the sensitivity level to ensure the best possible processing of the microphone signal through the channel. It is important that this input level is set and

optimized in the best way to achieve the cleanest sound possible.

1.8. HIGH, MID, LOW (EQ): These controls are for high, mid and low frequency regulation. Offering cut and boost of  $\pm 15$  dB, they allow a wide range of tonal variations to be explored. When the controls are positioned centrally there is no cut or boost of the selected frequency band. The adjustment is made on both channels.

1.9. WARM: When active, this low-pass filter dampens higher frequencies to produce a warmer sound when using bridge-mounted pickups such as the SCHERTLER STAT Series for violin, cello and double bass.

1.10. REVERB: This rotary control sets the level of the digital reverb on both channels.

1.11. MASTER: This rotary control regulates the master volume on both channels.

1.12. INSERT: This 1/4" stereo jack socket enables the connection of an external device (compressor, equalizer, etc.) in series to all the outputs.

1.13. LINE OUT: This unbalanced jack socket enables connection to external systems. The output volume depends on the regulation of the MASTER control.

1.14. DI OUT -15dB: A general XLR balanced output for connecting to external systems. The output volume does not depend on the regulation of the MASTER control, but is affected by changes in the channel volume.

2.1. POWER ON/OFF: System ON/OFF switch.

2.2. GROUND LIFT: This switch connects and disconnects the ground.

**2.3. MAINS POWER CONNECTION:**

Connection to mains		Fuse carrier
220 - 230 V~	50 Hz / 60 Hz	T 630 mA L 250 V
240 V~	50 Hz	T 630 mA L 250 V
120 V~	60 Hz	T 1 A L 250 V
100 V~	50 Hz / 60 Hz	T 1 A L 250 V

PLEASE ENSURE THAT THE CORRECT VOLTAGE IS OBSERVED AND THE ORIGINAL CONNECTION CABLE IS USED

# TECHNICAL INFORMATION

Weight	7.5 kg
Dimensions (LxDxH)	27 x 18 x 28 cm
Frequency Response (@ +/-3 dB)	55 Hz to 20 kHz
Sensitivity (1W/1m) @1 kHz	92.5 dB
Power	70 W pure analog power amp
SPL Max	108 dB
Speakers	Coaxial 1" dome tweeter, 5.5" woofer
Construction	12mm birch BB laminated
System - Format	Two way, bi-amplified - Bass reflex
Mic In connector	XLR
Mic In sensitivity	-52 dB
Mic In impedance	4.7 k $\Omega$
Instrument In connector	1/4" jack unbalanced
Instrument In sensitivity	-47 dB
Instrument In impedance	820 k $\Omega$
Insert	On master
Line Out connector	1/4" jack
Line Out level	0 dBu
Line Out impedance	200 $\Omega$
DI Out connector	XLR
DI Out level	-15 dBu
DI Out impedance	200 $\Omega$
Phantom Power (nominal)	24 VDC
Stat Power (10 VDC)	Yes
Effect	Spring-type digital reverb
Preamp	Class-A, no negative feedback, no integrated circuits
Stand mounting	n.a.
Available versions	Dark wood and anthracite

# FAQ

Where can I buy amplifier bags/accessories?

Amp bags, along with other SCHERTLER product accessories, are available from the online web shop at [www.schertler.com](http://www.schertler.com). You can buy the product itself and/or its accessories from the relevant product page.

Can I get a copy of this manual in other languages?

Digital versions of our manuals are available in English, Italian, German and French. These can be downloaded from the product pages of the SCHERTLER website: [www.schertler.com](http://www.schertler.com)

Can I bypass the internal power supply and power the amp via battery?

No, our amplifier electronics are designed for mains use only. It is not possible to modify the amp for "battery powering". You could however connect the amp to an external voltage compatible battery that can accommodate the amp's supplied power cable/plug.

Does the I/O INSERT allow you to put effects on all channels?

Yes, the INSERT connection works on the Master, so it affects all the channels.

How do I make the connections to use a second speaker or amplifier?

The easiest way to connect an external speaker (or a second active amp) is via the LINE OUT or DI OUT.

What is the best way to connect a delay or other external effect to my GIULIA X?

If you only have one instrument connected to your amp, you can use the INSERT plug. For this connection you will need a Y cable.

Will my condenser mic work with the GIULIA X's 24 V phantom power?

GIULIA X provides way more than the nominal 24 VDC, but, since it is not actually 48 V we cannot legally label it P48. However, most modern microphones will work just fine. For more technical information, please read the FAQ section on SCHERTLER website.

# APPENDIX

## WARRANTY

All SCHERTLER products are covered by a limited two-year factory warranty in respect of manufacturer defects. Details can be obtained from your local dealer / representative.

SCHERTLER SA strongly believes in "common sense". Therefore, misuse of our products is not covered under rights obtained through our warranty policy, or through internationally recognized terms and conditions. For more information on warranty, please visit the General Condition's page at [www.schertler.com](http://www.schertler.com)

## PRODUCT DISPOSAL

This product must not be disposed of in general household waste. It should be taken to a disposal center for electrical / electronic waste. Please note any local or national regulations that may be applicable here.

## TRADEMARKS

The SCHERTLER® name and logo are registered trade names / trademarks of SCHERTLER SA Switzerland. All SCHERTLER® products use proprietary technology and are covered by one or more worldwide patents.

## DISCLAIMER

All information and technical specifications published here are based on data that was available at the time of publication. SCHERTLER is, however, constantly aiming to improve its range of products and therefore reserves the right to amend product specifications and information without notice. SCHERTLER takes no responsibility for any direct or indirect damage (including loss of profit), which arises as a result of, or in connection with the information in this manual.

## COPYRIGHT
